

ICGSA Basketball Report
2015-2016
Submitted by Stacey Goyette

Polling: Michael Uhl coordinated the basketball polling and credits each class chairperson for making it a success. He does believe that we have voters who are not members but plans on correcting this next year. He also believes the polling is the most significant thing the ICGSA has going for it over other organizations and has questioned how we can tie in our organization with polling to get more membership.

All 5 Districts hosted their end of the season meeting on March 6th. The top 15 players were voted on by the attending coaches to form the 1st, 2nd, and 3rd All-State teams.

- District 1 was hosted by Gary Christlieb
- District 2 was hosted by Doug Springer
- District 3 was hosted by Joe Smith
- District 4 was hosted by Doug Laker
- District 5 was hosted by Michael Uhl

District Representatives report positive, impartial voting on behalf of voting members.

District 2 has requested adding an additional 5 players to All-State teams.

Chairperson Terry Minix combined results and sent them to Stacey Goyette. There were 2 known issues with nominations.

1. The Brebeuf coach did not get his nominations in on time. D3
2. An assistant coach nominated the player(s) and it was discovered the nomination form does not designate head coach. Coach was a member so nomination was accepted. D5

Basketball was not represented at the 2016 Annual ICGSA Conference. Due to the timing of current annual conference, it is the consensus of Basketball Committee that it will never be a successful event. It was also reported out of D3 that coaches are being overwhelmed with end of the season responsibilities like nomination forms, meetings, and various award recognition events.

There were no basketball expenditures presented to Stacey Goyette, the ICGSA liaison.

It has been presented to the basketball committee that the ICGSA host a September or October conference, with speaker(s), and the feedback has been positive. They believe the following needs to happen:

1. Centrally located.
2. Quality speakers
 - a. Can the budget be increased to make this happen?
